

Magic Uneraser 3.0 Recovers Deleted Files in Minutes

East Imperial Soft updates Magic Uneraser, the company's most affordable file recovery software for Windows. Version 3.0 of the popular data recovery tool adds the ability to unerase SD card content, and supports all major makes and models of flash-based storage including USB pen drives and memory cards. Based on a step-by-step wizards, Magic Uneraser guides users through the complex process of unerasing data one little step after another, making the recovery job easy even for occasional computer users. In addition to supporting flash-based storage media, the new release gains a built-in CD/DVD burner, offering the ability to save recoverable files onto a CD or DVD disc. The final addition is the ability to recover NTFS compressed files.

About Magic Uneraser

Magic Uneraser is an entry-level, easy and affordable solution for recovering deleted files and folders from all types of storage media. Built around a wizard-based user interface, Magic Uneraser is targeted towards home and office users who need a perfectly simple tool to unerase data and undelete recently deleted files. The key difference between Magic Uneraser and competing unerase tools on the market is the inclusion of a highly sophisticated file carving algorithm enabling surefooted recovery of files that no longer appear in the file system.

Magic Uneraser offers Windows users a simple and easy way to unerase deleted files and folders from FAT and NTFS hard drives, USB pen drives and all types of memory cards. Implementing content-aware analysis, Magic Uneraser can carve deleted files to ensure the maximum recovery rate possible. Implementing wizard-based, step-by-step data recovery, Magic Uneraser is suitable for use at home and in the office. The tool features pre-recovery preview, enabling the users to preview recoverable information before it's being recovered.

New in Version 3.0

The latest release adds the ability to unerase SD card content, and implements support for all types of flash-based media. By implementing its know-how about the operation of flash-based media into its entry-level product, East Imperial Soft enables surefooted recovery from both magnetic and solid-state media in an entry-level uneraser.

Version 3.0 features refreshed looks, making its already simple recovery process even easier for occasional computer users. The updated data recovery wizard offers fully guided, step by step operation to help users locate the missing data and select the most appropriate recovery technique when recovering information from the different types of media.

New to [Magic Uneraser 3.0](#) is the ability to burn files being recovered directly onto a CD or DVD media thanks to the built-in burner, allowing for safe operation in systems with a single storage device.

Finally, Magic Uneraser 3.0 can now recover NTFS-compressed files.

Compatibility

Magic Uneraser is compatible with all 32-bit and 64-bit versions of Windows from Windows XP to Windows 7 and Windows 8. Windows 2003 and 2008 Server are also supported. Magic Uneraser recognizes all versions of FAT and NTFS file systems, and supports all types of magnetic and solid-state storage media.

Pricing and Availability

Magic Uneraser is immediately available. North American pricing starts at \$39,95. Local prices may vary. Magic Uneraser 3.0 is available as a downloadable evaluation version. [Get your free trial copy](#)

About East Imperial Soft

Founded in 2002, East Imperial Soft develops data recovery software and supplies a comprehensive lineup of recovery tools to Windows users. The company's usability research made it possible to develop data recovery software to be used by occasional computer users with no prior experience in data recovery. The company's extensive range of solutions covers the needs of home and office computer users, data recovery professionals, OEM builders and service providers.
