Magic Partition Recovery: an All-In-One Data Recovery Solution

East Imperial Soft releases Magic Partition Recovery, the company's top of the line data recovery software to help computer users recover information from deleted and corrupted partitions and inaccessible storage media. Featuring innovative low-level algorithms for accessing the data, Magic Partition Recovery can effectively rebuild corrupted partitions and re-create the damaged file system from scratch. This new tools offers smarter recovery, analyzing more data sources than competing tools on the market. This approach results in a higher recovery rates compared to competing data recovery tools in the same class. Magic Partition Recovery supports the recovery of both FAT and NTFS partitions.

About Magic Partition Recovery

Magic Partition Recovery is an in-house data recovery software for Windows PCs. Allowing its users to recover deleted files and restoring missing information from healthy, damaged, formatted and inaccessible storage media, its main target are disks with corrupted or deleted partitions, missing or damaged file systems. Its highly sophisticated low-level analysis algorithms literally carve the disk for available information, effectively reconstructing the original partition structure and the file system.

Its highly efficient data recovery techniques are combined with a simple user interface, allowing everyone to make use of the product. Featuring an Explorer-like user interface, Magic Partition Recovery makes everyone feel at home when browsing deleted information.

Magic Partition Recovery offers two different recovery modes, effectively becoming is a dual-purpose tool. In Quick Recovery mode, the tool will analyze the file system and undelete files and folders in a matter of minutes. In Comprehensive Analysis mode, Magic Partition Recovery will carve the disk for traces of

available information, effectively restoring data from badly damaged, unreadable and inaccessible storage media.

Content-Aware Disk Analysis

In Comprehensive Analysis mode, Magic Partition Recovery performs a content-aware analysis of the entire disk surface, effectively carving files located on the disk by looking for identifiable signatures. Content-aware analysis helps recover several hundred types of files including documents, archives, databases, email messages, pictures, music and videos even if no recognizable file system is available.

Compatibility

Magic Partition Recovery is compatible with all 32-bit and 64-bit versions of Windows from Windows XP to Windows 7 and Windows 8. Windows 2003 and 2008 Server are also supported. Magic Partition Recovery recognizes all versions of FAT and NTFS file systems.

Pricing and Availability

Magic Partition Recovery is immediately available. North American pricing starts at $139. Local prices may vary. You can download Partition Recovery from manufacturer's Web site.

About East Imperial Soft
